A customer problem statement captures the customer's point of view so the solution can focus on what matters to them.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A second-year engineering student preparing for several exams (Rahul)	Understand lengthy study material and prepare revision notes in limited time	Making notes and summaries by hand takes too much of my study time	My material is scattered across notes, PDFs, textbooks and articles	Overwhelmed and short on time
PS-2	A student revising before examinations	Test my understanding and follow a realistic schedule	Creating flashcards, quizzes and a plan is repetitive and my plan ignores my exam dates	There is no personalized tool and I switch between many apps	Unprepared and unsure of my progress
PS-3	An administrator of the platform	Keep the platform secure and running smoothly	I cannot easily see user accounts, AI usage or system logs	Monitoring and access controls are not centralized	Concerned about control and reliability
